## 3Q 2012 Macro Highlights

Quantitative easing  
took over the scene  
towards the end of  
3Q12

- Stimulative policies reigned:
  - The Fed's open-ended QE3,
  - Prospect of additional QE by the BoE and BoJ
  - Additional ECB LTROs and bond purchases via the ECB's OMT (Outright Monetary Transactions) program
- In the Euro area, economic weakness - especially in periphery countries - and intense financial market stress persist.
- In China, the cyclical environment remains disappointing towards economic adjustment from 'quantity' to 'quality' of growth - large package of infrastructure investment and fiscal stimulus announced.
- Oil and gold were both on the rise gaining value above 10%

Rebalancing deepens  
&  
CBRT gets ready for  
global monetary  
easing

- The economy slowed down to 2.9% during 2Q12-- rebalancing continued with higher contribution of foreign demand and sustained weakness in domestic demand, while private investments contracted sharply.
- Current account deficit fell below US\$ 60 billion as of Aug'12 with poor domestic demand and export diversification.
- Although annual inflation reached 9.2% in September and the latest tax hikes pressure prices, CBRT guides for a more visible fall during 4Q12.
- CBRT is looking to ease monetary policy in the wake of recent developments in the economy and in policies abroad - prioritizing growth with an eye on inflation and financial stability.
- CBRT continued to utilize reserve requirement (RR) tool and Reserve Option Coefficients (ROCs) to manage liquidity -- gradually increased ROCs and introduced new coefficients for each assigned and additional tranches.
- After having appreciated by 4% and 1% against the currency basket in two consecutive quarters, TL appreciated again by 2% in 3Q12.
- Benchmark bond yield, on a monthly average basis, was down to 7.6% in 3Q12 from 9.1% in 2Q12.

## 9M 2012 Highlights

Balance sheet strength: distinguishing feature of Garanti...

### Increasingly customer-driven, liquid, low-risk and well-capitalized balance sheet

**Customer-driven asset composition:** Loans/Assets: 55%; Securities/Assets: 21%
