TURKISH ECONOMY OVERVIEW

TURKISH ECONOMY (I/II)

GDP GROWTH

(YoY)

- We expect GDP growth to reach around 2.5% y/y in 1H26. **Under our baseline scenario of gradually normalizing energy prices and a prudent policy mix, we maintain our 2026 GDP growth forecast at 3.0%.**

CBRT FUNDING RATE & CPI EXPECTATIONS

(End of the Period)

- Assuming continued fiscal discipline, a cautious CBRT stance, and a gradual normalization in energy prices in 2H26, **we forecast year-end consumer inflation to be 30%.**
- We expect the funding rate to gradually **converge toward the policy rate** by September. With limited room for policy rate cuts starting in 4Q26, the funding rate is expected to reach **36% by year-end.**

TURKISH ECONOMY (II/II)

CA DEFICIT / GDP (year end)

CG BUDGET DEFICIT / GDP (year end)

- **Weak external demand and elevated commodity prices**, contingent on developments in the Middle East conflict, continue to **weigh on the external balance. We forecast the current account deficit to widen to 3.5% of GDP in 2026.** Tourism revenues provide an important buffer during the summer months.

- The cash deficit-to-GDP ratio stood at 2.6% in June, supported by **resilient revenues and spending discipline**. Despite softer activity, given the strong performance of 1H26, budget deficit is expected not to deviate much from the MTP target of 3.5% of GDP.
