**2Q 2013 Macro Highlights**

**Mixed outlook on global growth with extreme volatility and uncertainty as Fed sees stimulus winding down**

- “Tapering” of the accommodative Federal Reserve monetary policy and market’s perception that the Fed’s quantitative easing program would end sooner than had been expected triggered a sharp sell-off in EM bonds, equities, and currencies.
- The eurozone economy remained relatively stagnant suggesting the worst of the recession has passed.
- Global volatility and weak growth in China weighed heavily on EM equities and commodity prices. Gold prices were down 23% as Brent oil finished the quarter down 7%.
- The Fed’s exit plans added to worries about slowing growth across the emerging world, rising interest rates, currency weakness and instability in major markets like Brazil and Turkey.

**Investment grade ratings suppressed under changing global dynamics, less optimism on growth, weaker currency, rising inflation, external vulnerabilities and political tension**

- 1Q GDP growth was 3% YoY -- moderate improvement but weaker positive outlook
  - growth dynamics changed: positive support by domestic demand led by government expenditures as external demand contributed negatively
  - ongoing contraction in private sector investment expenditures
- Rising during April and May, 12m current account deficit increased to US$ 53.6 billion as of May -- uncertainties remain regarding improvement in domestic demand and global economic growth signaling limited external demand contribution
- Yearly inflation rose to 8.3% at the end of 2Q13 from 7.3% at 1Q13 -- depreciation in TL is an upward risk, however, uncertainty regarding the growth outlook may limit the negative impact.
- CBRT gradually cut policy rate by 100 bps from 5.50% in 1Q13 to 4.5% as of 2Q13 and continued to utilize multiple tools in order to support financial stability -- moved the interest rate corridor lower by 100 bps, increased reserve requirement on FC liabilities and Reserve Option Coefficient for holding FC instead of TL.
- After having depreciated by 0.7% against the currency basket in 1Q13, TL depreciated with an acceleration by 2.6% in 2Q13.
- Benchmark bond yield, that fell below 6.4% at the end of 1Q13 and further to below 4.7% in May, increased to 7.5% at the end of the 2Q13 and hit 9.6% on July 11, a record high since 2Q12.
1H 2013 Highlights

**Lending strategy -- Chasing profitable growth opportunities**
- TL lending -- solid growth with selective market share gains. Main drivers:
  - Lucrative retail products: Mortgages (10% q-o-q), GPLs (9% q-o-q) & Auto loans (6% q-o-q)
  - Mid&long-term TL working capital loans
- FC lending: Awaited pick-up started in 2Q, with project finance loans in energy & utilities
  - Growth: 2Q13: 4% vs. 1Q 13: 1%

**Actively shaped & FRN-heavy securities portfolio** – Securities/Assets: 18%

**Solid & well-diversified funding mix providing comfortable liquidity**
- Deposits fund 57% of assets:
  - ~23% of total customer deposits are demand deposits
  - Opportunistic utilization of alternative funding sources to effectively manage costs & duration mismatch

**Risk-return balance priority**
- Sound asset quality – declining new NPL inflows, continued progress in collections
- Prudent coverage and provisioning levels

**Well-capitalization**
- Basel II CAR: 15.2%, Leverage: 8x

**Healthy profit generation**
- Comparable* net income up by 30% y-o-y; ROAE: 21%; ROAA: 2.4%,
- Well-defended margin
- Outstanding performance in sustainable revenue growth -- #1 in net fees & commissions
- Strict cost discipline

* Please refer to slide 18 for comparable net income analysis
Solid profit on the back of strong balance sheet

**Net Income (TL million)**

**Q-o-Q Evolution of Margin Components (in bps)**

- **1Q13 NIM**: 513 bps
  - Loans: -21 bps
  - Securities exc. CPI: -25 bps
  - CPI Sec.: -29 bps
  - Other Income Items: -5 bps
  - Deposits: +20 bps
  - Provisions: -105 bps
  - FX & Trading: +37 bps

- **2Q13 NIM**: 462 bps
  - Adjusted NIM: -93 bps

**Quarterly NIM** down slightly by **22bps** when excluding CPI linker volatility

TL depreciation against FX in 2Q, boosted Avg IEA base & negatively impacted NIM

**Adj. NIM** down by ~93bps due to:

- Relatively higher general provisioning q-o-q
- Additional provisions for the alignment of cash coverage to pre-NPL sale level

Adjustments to NIM: Net Interest Income/ Average IEA adjusted by FX gain/loss, provision for loans and securities, and net trading income/loss
Outstanding performance in sustainable revenues
