

To walk the same path with our customers, to internalize their problems and be part of the solution, not the problem, we act together. Because we are not only the bank of our customers, but also a solution partner.

Our main goal is to grow together with our customers. That's why we will always continue to give them all the support we can on this path.

First of all, with our identity as a banker, our main purpose is to provide financial consultancy to our customers and to make them feel that we are always by their side.

With the knowledge and experience of our 28 commercial branches and 24 regions, we swiftly meet our customers' needs by offering dynamic solutions.

In addition, as a solution partner, we bond continually for sustainable growth of our customers' businesses.

In areas such as energy efficiency, requiring multi-dimensional perspectives, we share our knowledge and support our customers.

Through proactively analyzing their needs, we design innovative products and support them in quickly adapting to any breakthrough.

We work to shape all our customized products and services to the ever-changing and evolving needs.

Within this scope, we launched Türkiye's first corporate Green Vehicle Loan. We are always in pursuit of such and more differentiating, innovative product and service offerings.

As a result of all these, we are preferred by our customers and we become our customers' primary business partner.

On this journey, we know that we need to be a strong team acting as one, together with customers and employees. Because Garanti BBVA listens, understands and solves.
